

100% Natural Organic Stone & Terrazzo

La valorizzazione della materia naturale,
senza compromessi

Dalla pietra alla terra

Un percorso materico tra tradizione, ricerca e sperimentazione

Un viaggio attraverso la materia naturale, dalla forza primordiale della pietra al calore tattile della terracotta, ogni collezione rappresenta un passaggio in questa narrazione: un'evoluzione formale e tecnica che mantiene intatto il legame con le origini.

Terrazzostone

L'inizio è nella pietra, nella sua espressione più pura e scultorea. Terrazzostone lavora graniglie di marmo naturale in grande formato, trasformandole in superfici che uniscono rigore compositivo e vitalità materica. Ciottoli burattati e palladiana diventano trame architettoniche, capaci di evocare il terrazzo tradizionale e, al contempo, di proiettarlo in una dimensione contemporanea.

Bio-Stone

Dal marmo recuperato nascono nuove geometrie sostenibili. Bio-Stone traduce i principi dell'economia circolare in un linguaggio progettuale raffinato: terrazzi realizzati con materiali riciclati, 100% eco-compatibili e rinnovabili. La componente tecnica incontra una ricerca cromatica e materica che ne amplifica il valore estetico, offrendo soluzioni consapevoli senza rinunciare alla bellezza.

Pebbles Terrazzo

Qui la regola lascia spazio all'interpretazione. Pebbles Terrazzo combina la granulometria tipica dei ciottoli con cromie e texture inedite, talvolta provenienti da materiale riciclato, per dare vita a superfici dinamiche e dall'identità forte. È la sezione più libera e sperimentale del percorso, dove la pietra diventa strumento di espressione.

Pebbles Stone

La pietra torna protagonista nella sua forma più preziosa. Pebbles Stone raccoglie marmi e pietre selezionate e le trasforma in mosaici e ciottoli di alta gamma, frutto di un processo artigianale interamente sviluppato in Italia. Questi elementi possono vivere come dettagli decorativi o diventare protagonisti assoluti, creando contrasti sofisticati con legno, metallo, cemento o altre pietre.

1K

1Kotto accoglie tre anime: TerrazzoKotto che fonde il calore del cotto con decorazioni in pietra naturale; TerraKotta, porosa e artigianale e 1Kotto Sintered, compatto e tecnologico. È il punto d'arrivo in cui tradizione e innovazione si incontrano, unendo forza minerale al calore della terra.

TERRAZZOSTONE

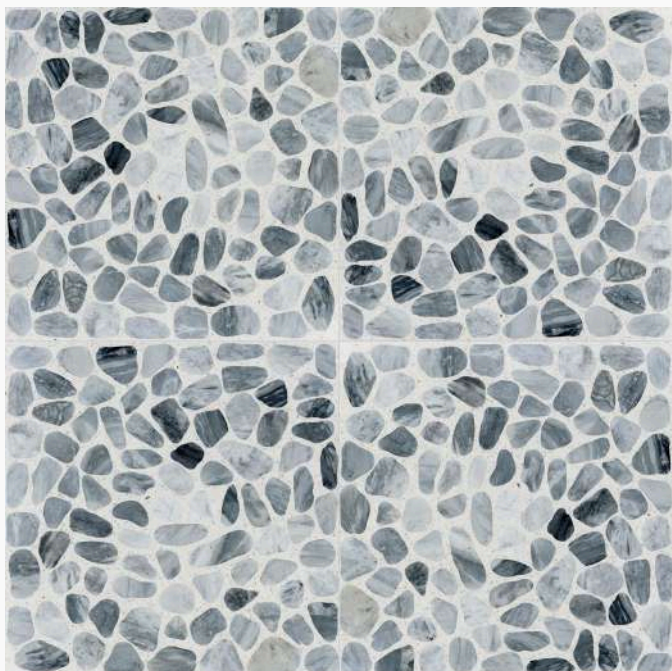

WORKING WITH MOTHER NATURE

Inspired by Marmorex, Crafted By Art2000

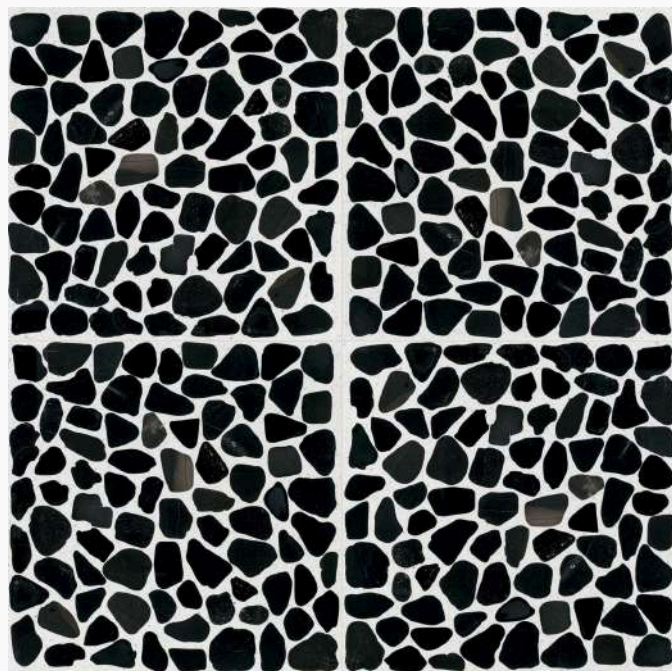

La collezione Terrazzo Stone si caratterizza per l'utilizzo di graniglie di pietre naturali in grande formato. La serie è disponibile in due formati: ciottoli burattati e palladiana, sono molte le combinazioni possibili: fondo bianco/grigio/beige/nero con pietre bianche/beige/nero/verde oppure miscelate.

Terrazzo Stone is characterised by large pieces of inlaid marble. The series features two formats: tumbled pebbles or crazy pavers, so called 'palladiana'. And many colour combinations: white/grey/beige/black base with white/mix/beige/black/green marble spots.

BIOSTONE

Ecologically Recycled Stones and Terrazzo

Riciclaggio e selezione dei materiali di scarto provenienti dall'industria lapidea e delle costruzioni. Una nuova generazione di materiali ispirati ai principi dell'economia circolare. 100% eco-compatibili, riciclabili e rinnovabili, queste superfici soddisfano le esigenze di qualità estetica e prestazioni tecniche in modo consapevole e responsabile.

Recycling and selecting the waste material resulting from the stone and construction industry. A new generation of materials inspired by the principles of circular economy. 100% eco-compatible, recyclable and renewable, these surfaces meet the need for aesthetic quality and technical performance in a conscious and responsible way.

PEBBLES STONE

Ispirata alla tradizione e al design, Art2000 produce mosaici in pietra in Emilia, curando selezione, lavorazione e montaggio. Collezioni eleganti e 100% made in Italy, ideali come inserti esclusivi o protagonisti degli spazi. La versatilità del materiale consente abbinamenti con legno, metalli, cementi e marmi, per soluzioni contemporanee e di grande charme.

Inspired by tradition and design, Art2000 crafts stone mosaics in Emilia, overseeing selection, processing and assembly. Elegant collections, 100% made in Italy, ideal as exclusive inserts or as the main feature of interiors. The material's versatility allows combinations with wood, metals, cement and marble, creating contemporary solutions of great charm.

TERRAZZO¹KOTTO

DOVE IL TERRAZZO INCONTRA LA TERRACOTTA

Terrazzocotto unisce la ricchezza decorativa del terrazzo in pietra naturale alla solidità della terracotta. Le graniglie di marmo e pietre pregiate creano disegni e sfumature uniche, valorizzate dal calore del supporto in cotto, per superfici originali e di forte impatto estetico.

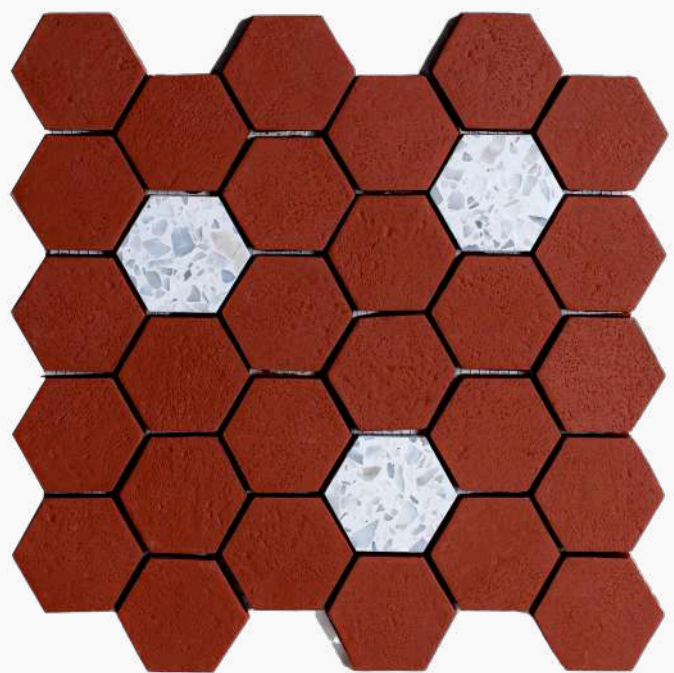

Terrazzocotto combines the decorative richness of terrazzo in natural stone with the solidity of terracotta. Marble chips and fine natural stones create unique patterns and shades, enhanced by the warmth of the clay base, for original surfaces with a strong visual impact.

1KOTTO

SUSTAINABLE AND TECHNOLOGICALLY ADVANCED TERRACOTTA

1KOTTO is the result of a long research on raw materials and careful development of production processes. Our goal has been to create an artisanal product that can be made in a more industrialized way than the traditional hand production, without however distorting the concept of terracotta.

Thanks to the combination of advanced techniques and our attention to each stage of the production process, we are able to offer a product with superior characteristics and able to meet the most modern needs of the market, without compromising the authenticity and beauty of the terracotta.

One of its distinctive features is its 100% natural composition, which makes it environmentally friendly and sustainable. In addition, our terracotta is the only one that can be produced with a thickness of only 1cm (different thicknesses are available on request), making it ideal for a wide range of applications, from flooring to architectural elements. Thanks to its resistance, durability and timeless beauty, our technologically advanced terracotta is the perfect choice for those looking for a high-quality product with a unique style.

TERRA/KOTTA

Terra-Kotta is our traditional clay line, characterized by a porous and breathable body that gives the natural product a timeless charm. We only use first choice clays, kneaded and processed to obtain a higher density and compactness, which allow us to create formats with relatively low thickness.

Terra-Kotta can be glazed or decorated on request, giving rise to endless possibilities of customization, it

is a material suitable for indoor uses. Terra-Kotta has two variants: Silk and "handmade Aged" customizable according to customer requirements in terms of shape, size, surface and color.

Our priority is customer satisfaction and we want to ensure the highest quality of our product in every situation.

1KOTTO VITRIFIED

Vitrified-Kotto is a material designed to offer an easy-to-use alternative to those who want the same aesthetic characteristics of Terra-Kotta, but with a finished product ready for installation.

Thanks to the use of a more rich and refined clay mixture combined with other natural elements and careful mixing, drying and baking processes, Vitrified-Kotto has superior technical properties and a density and compactness that allow reduced thickness. At the end of the production cycle, we can guarantee the customer

that Vitrified-Kotto is a frost-proof, waterproof, stain-resistant and acid-proof material without any obvious impurities.

Vitrified-Kotto has two variants: Silk and "handmade Aged" (glazed and decorated on request), but can be customized according to customer's requirements in terms of shape, size, surface and color. For maintenance, we recommend a simple post-installation surface cleaning product, since Vitrified-Kotto does not require further treatment.
